This Mapping E-resources is brought to you for free and open access by the Design, Build, Experience at Scholarship @ Claremont. It has been accepted for inclusion in Design, Build, Experience: Process Assignments by an authorized administrator of Scholarship @ Claremont. For more information, please contact scholarship@cuc.claremont.edu.
Overview: This assignment is designed to get you thinking about the Library’s e-resources, specifically what they are and how they relate to each other.

Step 1: Exploration
Explore the e-resources on this page:
http://libraries.claremont.edu/resources/databases/
Make sure you visit at least one of each type listed below:

- articles (such as those found in academic journals, and can often be searched in their full text)
- audio (such as streaming audio or MP3 files)
- citations (information about an article and how to locate it, but not the full text)
- data
- e-books
- images
- primary resources (this is a huge category that can include newspapers, scanned digital manuscripts, images, and many other formats)
- video (such as streaming films)

Step 2: Mapping
Imagine that you had to guide someone else through Library e-resources. What would a map to this “realm” look like? Draw a map as abstract or realistic as you like.

Bring your completed maps to class on March 1
PRACTICAL GUIDE to different kind of resources

**Sounds**
- Music -> Major Databases - Audio - Sounds
  - 3 or just go to the "Audio" Database
  - Or you can use the "Audio" Database

**Reading articles**
- Most Databases have articles, but I like me areas
- I like the "Citation" indexes (this one is kinda boring)
- Data -> Statistics! It's got all the numbers!

**E-Books**
- Literally as click on the "E-Books" under the "By Type & Format"

**Images & Video**
- Most of these kinds of Resources are fairly easy to find
- Inherent navigation built into the site.

WHAT THE DATABASE(S)
FEEL LIKE TO ME

I will take advantage of all this information!

There is too much stuff...
I never knew there were 1175 different instruments...

So overwhelming!
ART 176 Library Art Installation Project: Mapping E-Resources
Due: Wednesday, March 1, 2017

Overview: This assignment is designed to get you thinking about the Library's e-resources, specifically what they are and how they relate to each other.

Step 1: Exploration
Explore the e-resources on this page:
http://libraries.claremont.edu/resources/databases/
Make sure you visit at least one of each type listed below:

- articles (such as those found in academic journals, and can often be searched in their full text)
- audio (such as streaming audio or MP3 files)
- citations (information about an article and how to locate it, but not the full text)
- data
- e-books
- images
- primary resources (the original source material, such as newspapers, scanned digital manuscripts, maps, etc.)

What would a...
E - Resources available are, you choose that option?

A. e-books, videos, audio
B. articles, audio, data, images, primary sources, video

1. Potential to lead to all e-resource types
   a. Probably going to primarily return one resource type.
   b. Probably going to primarily return one resource type.

2. Potential to lead to all e-resource types, likely to lead to any a few types
   a. Probably going to primarily return one resource type, similar to b.
   b. Probably going to primarily return one resource type similar to a.

C. Probably going to return only one type of e-resource.

D. Will return resources based on content specification by user.

E. Resources have been reached.
