Food, Nutrition, Physical Activity, and the Prevention of Cancer: a Global Perspective

Marmot, M; Atinmo, T; Byers, T; Chen, J; Hirohata, T; Jackson, A; (2007) Food, Nutrition, Physical Activity, and the Prevention of Cancer: a Global Perspective. (WCRF/AICR Expert Report). World Cancer Research Fund / American Institute for Cancer Research: Washington DC, US.

Abstract

This Report has a number of inter-related general purposes. One is to explore the extent to which food, nutrition, physical activity, and body composition modify the risk of cancer, and to specify which factors are most important. To the extent that environmental factors such as food, nutrition, and physical activity influence the risk of cancer, it is a preventable disease. The Report specifies recommendations based on solid evidence which, when followed, will be expected to reduce the incidence of cancer.

To: <editor-cmc_theses-1328@scholarship.claremont.edu>
Subject: Regarding status of senior thesis

To whom it may concern,

Sorry to be potentially bothersome, but I was wondering about when the link to my thesis online will be going live. I've already had one professor from UCI ask for a copy, and I will be attending an undergraduate conference on Saturday (as in two days from now) and having a live link would be useful. Can I expect that to be the case in the near future, or is there any way to speed up the process? Again, sorry to be an inconvenience, but it has been a while since I submitted so I have no idea what stage of the process it's at. Thanks in advance for your assistance.
