Abstract
Many sources date the pit-firing process as a 30,000 plus years-old ceramic firing technique. Every year I take my AP 3D Design class to the beach to fire ceramic pieces using this method. Being a contemporary sculptor who shows in Los Angeles I have always appreciated pit-fired pieces but never used one in my own art practice until now. A connection between the first method of firing ceramics and my art practice seemed unrelated. The title for my piece might add to the disconnect; and yet these seemingly unrelated elements force the work into a place where the artistic process and art object coexist.
