Epsilon and Delta: A Little Love Story

Bonnie Shulman
Bates College
Lewiston, Maine

She reads her Calculus text:

Given an epsilon
do si do
find a delta
if you can
Approach
oh so close
Delta on the domain
pursues epsilon on the range
along lazy eight lane
ad infinitum

She begins to doze:

Delta lasoos epsilon
they get married and go live
on the one-over-ex-square ranch
with an area they can paint
but never walk around
not enough fence in the universe
to contain it
but enough paint to cover it
so strange

She dreams:

Their herd of discrete cattle
roam the infinite range
bounded by zero below
with domain greater than one
heading off into the horizon
they live happily
ad infinitum
