And when they ask why I love you,  
I divulge: in your universe,  
normality is special, naturality  
is contrived, fields can be infinite  
and singularities are as commonplace  
as odd primes.

I embrace,  
cloistered, your level curves,  
your succulent patois,  
your lattices begging  
for inversion, your fat phis  
and eely xis, the pleasure of being bound  
by constraints.

Absurd and precise,  
like the language of a wary lover's hands,  
you are reluctant to be laid  
bare; but oh, how you may be coaxed into revealing  
such surprising  
and such wondrous  
secrets.
