JHM is an open access bi-annual journal sponsored by the Claremont Center for the Mathematical Sciences and published by the Claremont Colleges Library | ISSN 2159-8118 | http://scholarship.claremont.edu/jhm/

The editorial staff of JHM works hard to make sure the scholarship disseminated in JHM is accurate and upholds professional ethical guidelines. However the views and opinions expressed in each published manuscript belong exclusively to the individual contributor(s). The publisher and the editors do not endorse or accept responsibility for them. See https://scholarship.claremont.edu/jhm/policies.html for more information.
At times when I’m required to wrestle integrals then I prefer the functions named for Friedrich Bessel, modified or regular.

When integrals turn into J’s or series built from I-sub-n I’m happier than on those days the letter F pops up again.

Their MATLAB functions work, I find. I, J, F, K all get it done. And I can’t tell you why I mind the hypergeometric one.
