Job Announcement:
*Guilford College Is Hiring A Chair
For Its Mathematics Department*

Mark Dixon

Art Department, Guilford College, Greensboro, North Carolina, USA
dixonfm@guilford.edu

Guilford College is looking to hire a leader and educator of vision to chair its mathematics department. The chair will have the opportunity to build a revolutionary mathematics program that invites all students into the joy, beauty, creativity, and vitality of mathematics.

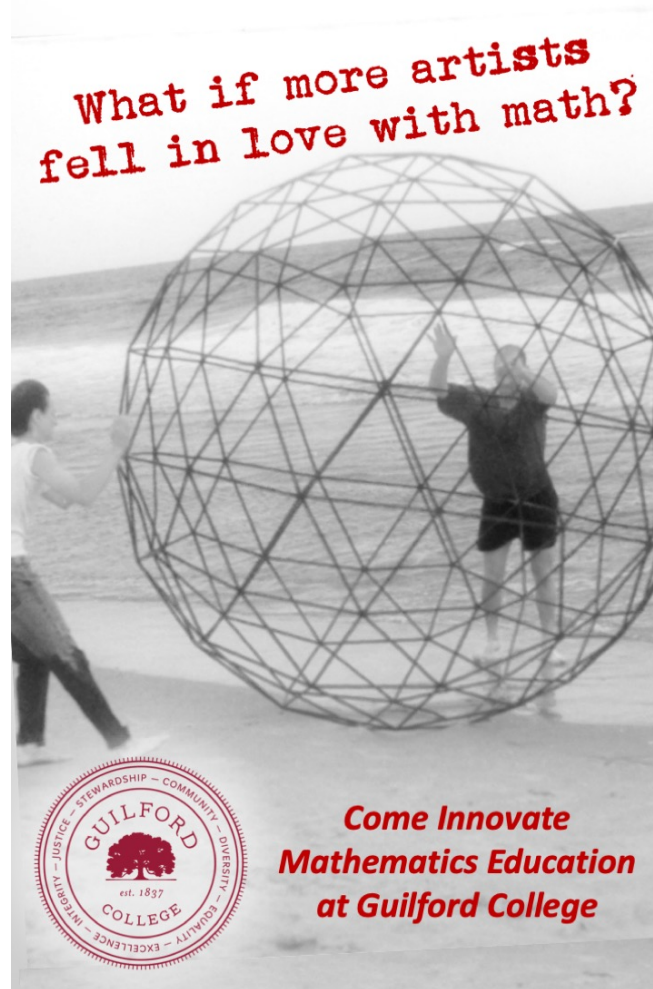

Guilford is hiring a chair for its mathematics department. This means:

- Implementing inclusive, innovative, and effective pedagogy that works for math majors, theater majors, and all students regardless of identity.
- Supporting your vision with staffing and future tenure-track hires.
- Working effectively with departments whose majors need math.
- Maybe some thrilling cross-disciplinary collaborations?!
- Definitely spreading math love!

Founded by Quakers in 1873, [Guilford College](#) is a gem of a liberal arts college with top-notch faculty, strong community, and innovative curriculum. Faculty place emphasis on teaching excellence and rich academic relationships with students.

Greensboro, NC, is a few hours from the Atlantic coast and Great Smoky Mountains. Guilford is one of seven institutions of higher learning operating in the city.

Guilford has an organic farm, a Bonner Scholars Program, a Center for Principled Problem Solving and Excellence in Teaching, a thriving arts division, and 300 acres of forest that is recognized by the National Parks Service as an important Underground Railroad site.

Guilford College—and this search committee—believe that a faculty representative of people of diverse backgrounds, experiences, and perspectives is central to our mandate to prepare students for the society in which they will live and the vocations they will pursue. We are convinced that having a diverse faculty reflects the College’s stated values of guaranteeing and protecting the dignity of each individual, while pursuing the common goals of our larger society. We define diversity broadly to include group differences (based on age, race, gender, sexual orientation, disabilities, ethnicity, religion, and national origin) as well as individual differences, including career and life experiences, socioeconomic background, geographic roots, and other variables.
