JHM is an open access bi-annual journal sponsored by the Claremont Center for the Mathematical Sciences and published by the Claremont Colleges Library | ISSN 2159-8118 | http://scholarship.claremont.edu/jhm/

The editorial staff of JHM works hard to make sure the scholarship disseminated in JHM is accurate and upholds professional ethical guidelines. However the views and opinions expressed in each published manuscript belong exclusively to the individual contributor(s). The publisher and the editors do not endorse or accept responsibility for them. See https://scholarship.claremont.edu/jhm/policies.html for more information.
What’s So Great About Non-Orientable Manifolds?

Michael McCormick\textsuperscript{1}

mikemc@bitstream.net

Möbius strips
have just one side
Klein bottles too

Left hand or right
they see the world
from one point of view

A torus is better because
donuts with insides and outsides

let you have sprinkles
and eat your cake too

\textsuperscript{1}Michael McCormick is a widely published poet whose original training was in mathematics (University of Wisconsin - Madison ’82) where he specialized in topology and learned to love non-orientable manifolds.
