The Journal of Humanistic Mathematics invites submissions of mathematical poetry for an upcoming poetry folder tentatively titled Mathematical Constants Beyond the Half-Circle. Please send your submissions via email to the editors by November 1, 2022. Publication decisions will be made by December 31, 2022. The folder is expected to appear in January 2023.

The Journal of Humanistic Mathematics invites submissions of mathematical poetry for an upcoming poetry folder tentatively titled Mathematical Constants Beyond the Half-Circle.

Everybody (except the cult of tau) loves pi. So do we. But the world of numbers is much bigger than that. Perhaps you like Euler's constant? Or you think phi is exquisite? How about numbers that play important roles in other contexts, like Planck's constant which saved the heroes of a certain small Indiana town in 1986?

With this call, we are looking to collect poetry that all together will showcase the wealth and breadth of mathematical constants. We have no formal constraints and we are definitely open to experimentation.

Please send your submissions (in a **PDF file** including **no more than two** poems per poet) **via email to the editors** by November 1, 2022. If you are not able to use email, feel free to use snail mail instead; our postal address is

Journal of Humanistic Mathematics
Claremont Center for Mathematical Sciences
610 North College Avenue

Claremont, CA 91711
United States of America

Note however that email is a much more certain way to reach us.

Publication decisions will be made by December 31, 2022. The folder is expected to appear in January 2023.
